WORKSHOP SERVICES

SERVICE PACKAGES

BASIC

£35

Our first level of service to give your bike a 'once over'.

The focus is to ensure the bike is secure and efficient to ride, with brakes and gears set up, bolts checked and the headset and bottom bracket installed correctly. Any areas of the bike that require additional servicing are also identified.

STANDARD

£65

This is our most popular service...

Building on the Basic Service it gives extra love to your gears, with the whole drivetrain removed from bike and cleaned in the 'parts washer' and refitted (or replaced if required). More time is also allowed to check and true your wheels.

DELUXE

£115

This is 'the works' and the cheapest way to give you that new bike feeling!

All parts are removed from frame and cleaned in the 'parts washer'. Your frame is cleaned to remove mud and grime, and inspected for damage. The headset and BB are removed, greased and refitted, with bearings replaced as required. The hubs are also stripped down and bearings regreased.

Please note: additional labour charges may apply for necessary work that is outside the scope of each service level.

All prices exclude the cost of new parts. The fitting of any new parts will always be agreed prior to the work being carried out.

Please collect your bike on time! We reserve the right to charge for storage if bikes are not collected on time.
